

Overview: The Transportation Demand Management Committee made the decision to recommend the Lab resurrect a carpool program. Jim Krupnick – COO, approved the establishing of a new car pool program and the pilot.

This program starting in the initial stage on May 2, 2011 will be on going. As the program progresses, we will be soliciting comments and suggestions Lab wide on how to improve the program.

The program is voluntary and will benefit those with general parking. Those interested will form their own car pool of three (or more) individuals. Those individuals will go to the Badge Office and exchange their general parking permits for carpool permits. Each morning when a car comes through the Blackberry or Strawberry gate (not available at Grizzly Gate) with a car pool permit and three, or more individuals in the vehicle the security officer will issue that person a daily (stamp dated for that particular day) paper dashboard pass. The presence of the car pool pass and the dated dash board pass will permit that individual to park in Blue Triangle parking. Should an individual have a car pool pass and not have three or more individuals they will not be issued a dashboard pass and without it their car pool pass allows the person to park in a general space only.

Resources: There are a number of resources available to establish or join a carpool.
